

OJASVA SRIVASTAVA

Backend Engineer | Scalable Systems, Microservices, and AI-Driven Tooling | Ex-Amazon, Walmart

+1 (929) 509-5728 | ojasva22@gmail.com | [linkedin.com/in/ojasva-srivastava/](https://www.linkedin.com/in/ojasva-srivastava/)

PROFESSIONAL EXPERIENCE

- Amazon** **North Reading, MA, USA**
Software Engineer Intern *May 2025 - August 2025*
 - Built a GenAI-powered CLI assistant (**LangChain + Bedrock Titan + Guardrails**) that automated log debugging and doc retrieval, ensuring safe responses and cutting incident resolution time by 40%.
 - Developed a parallelized embedding pipeline** (Titan → S3 Vector Store + OpenSearch KNN) that accelerated semantic log similarity search **3× faster** across millions of records.
 - Integrated domain **RAG** pipelines for root-cause tracing and system knowledge retrieval, improving developer triage accuracy.
 - Developed **context-aware multi-step LLM interactions** using **DynamoDB** as a short-term session memory store.
 - Partnered with service owners to integrate the AI assistant into internal incident workflows, improving root-cause coverage.
- Walmart** **Bengaluru, KA, India**
Software Engineer III *August 2022 - August 2024*
 - Owned and operated a **Tier-0 microservice** powering Walmart Canada's customer orders, ensuring **99.99% uptime** and **zero critical downtime incidents** across millions of users.
 - Designed and deployed** a new backend microservice with dynamic filtering and caching, boosting **search conversion rates by 20%**.
 - Embedded **regression, integration, and load testing** directly into CI/CD pipelines (Jenkins + JUnit + JMeter), reducing post-deployment failures by **90%**.
 - Strengthened service resilience through **Kubernetes, Istio, and autoscaling**, validating stability at **1M+ requests/minute** via synthetic load tests.
 - Introduced **service registry, rate-limiting, and fault-injection testing**, hardening system reliability during traffic surges.
 - Implemented **priority routing with Azure SQL**, eliminating cross-datacenter timeouts and **improving API reliability for critical services**.
 - Mentored** junior developers through design reviews, improving team code quality and onboarding speed.
- Piramal Finance** **Bengaluru, KA, India**
Software Engineer *August 2021 - August 2022*
 - Designed **REST APIs** to streamline lead onboarding and loan creation, improving partner integration workflows.
 - Implemented **Splunk and Grafana** dashboards with alerts, improving anomaly detection and enhancing incident response efficiency by 30% while ensuring service robustness during peak loads.
 - Built Kafka-based file parsing microservice (**MongoDB + REST**) that accelerated partner processing.
 - Automated daily reporting with **cron-based MongoDB** system to generate Excel reports, eliminating manual work and boosting operational efficiency.
- Baker Hughes** **Mumbai City, MH, India**
Software Engineer *May 2020 - August 2021*
 - Developed a modular **REST-based Test Data Generator**, reducing QA teams' database retrieval times and improving testing speed.
 - Upgraded microservices (10K+ LOC) from Java 8 → 11, with full regression validation to ensure zero production regressions.
 - Automated monitoring workflows with **shell scripts** for email alerts, reducing incident response time by 50%.
 - Remediated **OSS and SAST vulnerabilities**, ensuring license compliance and reducing security risks.

SKILLS

- Backend & Languages:** Java, Python, SQL, Shell, JavaScript, HTML, CSS
- Frameworks & Libraries:** Spring Boot, Looper, LangChain
- Cloud & Infrastructure:** AWS (Bedrock, Lambda, DynamoDB, S3, Lex, SES), Azure, Kubernetes, Docker, Terraform, Spark
- Databases & Search:** PostgreSQL, MongoDB, DynamoDB, OpenSearch
- Messaging & Streaming:** Kafka
- LLM & Agent Systems:** LangChain, Retrieval-Augmented Generation (RAG), Multi-Agent Frameworks, Guardrails
- DevOps & Monitoring:** Git, Jenkins, GitHub Actions, Prometheus, Grafana, Splunk, Postman
- Testing & QA:** JUnit, JMeter, Load Testing, Performance Testing, Integration Testing, Regression Testing

EDUCATION

- New York University (NYU)** — MS in Computer Science (Graduation: Dec 2025)
- Vellore Institute of Technology (VIT)** — BTech in Computer Science
